

# Liner Value = Quality + Fit + Price + Delivery

Using only 20 and 28 Mil virgin vinyl, our craftsmen employ state-of-the-art radio frequency equipment. This ensures that every seam is sealed to last. Special UV inhibitors in our liners help them hold up to the harsh environment in your pool and resistance to sunlight, bacteria, fungus, chemicals and cold.

### The Right Fit Every Time

The better your inground liner fits, the better it looks and wears. At GLI we utilize sophisticated computer-aided design and material cutting systems. This ensures that your pool liner is custom made to your particular pool specifications.

### Three Day Delivery

When it absolutely, positively has to be there, our Express Service can provide a quality custom fit GLI liner on its way to you in as little as three business days.
